## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-16 and 37, drawn to a water system, classified in class 210, subclass 198.1.
  - II. Claims 17-19, drawn to a control system for maintaining water quality, classified in class 210, subclass 143.
  - III. Claims 20-36, drawn to methods for water treatment, classified in class 210, subclass 739.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the combination does not require a microprocessor for analyzing an input signal according to a logic program code. The subcombination has separate utility such as in the monitoring of liquids other than water.
3. Inventions III and I or II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used

Art Unit: 1724

to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus as claimed can be used to practice another and materially different process, such as in the maintaining of quality in liquids other than water, e.g. hydrocarbons.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. No telephone call was made to the applicant to request an oral election to the above restriction requirement because the requirement is complex (three-way).

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
